# Vector EHS Management

Powering Safer, Compliant, and More Efficient Operations

Unify your organization's safety, compliance, and reporting functions into a single connected platform. Vector EHS provides safety leaders with real-time insights into performance, automates compliance processes, and transforms data into prevention, so your teams can focus on keeping people safe and operations running smoothly.

## Incidents & Claims Management

- Investigate and analyze every type of workplace incident, including injuries, illnesses, near misses, vehicle accidents, environmental events, and property damage.
- Auto-generate OSHA 301, 300, and 300A forms for fast, accurate recordkeeping.
- Drill into root causes and trends to implement corrective actions that prevent recurrence and reduce costs.

## Inspections & Observations

- Create or customize pre-built checklists to evaluate compliance with essential regulatory standards.
- Automate inspection scheduling and assign corrective actions, while using real-time alerts and reminders to promote accountability.

## Dashboards, Metrics, & Reporting

- Save time and effort with tracking capabilities of over 100 pre-built leading and lagging indicators.
- Monitor the most relevant data for your EHS objectives using customizable KPIs and personalized dashboards.
- Keep key stakeholders updated on safety activities throughout your organization using automated, customized reports that are distributed according to your schedule.

## Risk Management

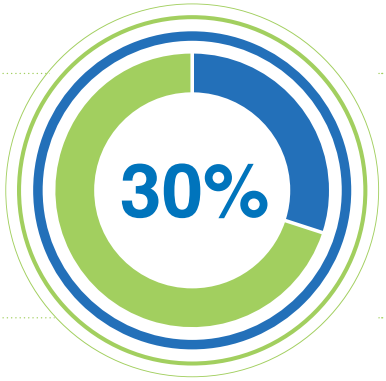
- Shift from reactive to proactive risk control with the ability to record, assess, and resolve hazards and safety concerns before they impact operations.
- Perform job safety analyses and assess residual risk to uncover hidden threats early, preventing disruptions to operations or safety performance.

## Proven Results

Vector EHS powers safer, more compliant operations across thousands of worksites helping customers achieve measurable results, including:

- **78% reduction** in employee injuries within five years
- **57% decrease** in average annual workers' compensation payouts
- Incident investigations reduced from **18 days to 4 days**

Organizations that partner with Vector demonstrate **30% stronger safety performance**, with lower incident rates and measurable improvements in operational reliability and workforce productivity.



## Benefits

### Improve the Efficiency and Visibility

- Save time with pre-built dashboards, forms, and templates that streamline data collection and reporting.
- Integrate seamlessly with HR, payroll, and other enterprise systems to eliminate redundant data entry and provide real-time visibility into safety performance across every site.

### Streamline Compliance & Reporting

- Automate OSHA recordkeeping and access digital compliance logs instantly.
- Reduce the risk of fines and penalties with accurate, audit-ready documentation that keeps teams inspection-ready at all times.

### Reduce Incident Costs

- Leverage real-time data to uncover risk patterns, prevent repeat incidents, and drive measurable improvement in safety outcomes.
- Vector EHS equips organizations with the insights needed to reduce incident costs and show leadership the tangible value of proactive safety management.

### Ensure Consistency and Transparency

- Standardize safety processes across regions, departments, and worksites.
- Automated dashboards, notifications, and scheduled reports keep executives and EHS leaders aligned on safety goals and performance progress.

## Modules

- ✔ Incidents
- ✔ Claims
- ✔ Inspections
- ✔ Observations
- ✔ Job Safety Analysis
