

The Training Platform Built for Your Industrial Workforce

Develop a more skilled, productive, efficient workforce with our award-winning eLearning courses and learning management system (LMS). Our eLearning courses feature award-winning 3D animations and our LMS was designed specifically for the training needs of industrial organizations like yours.

Increase Workforce Performance & Efficiency

Improve Operational Performance & Efficiencies

Decrease operational downtime due to errors and skilled labor shortages; and reduce costly wastes and inefficiencies.

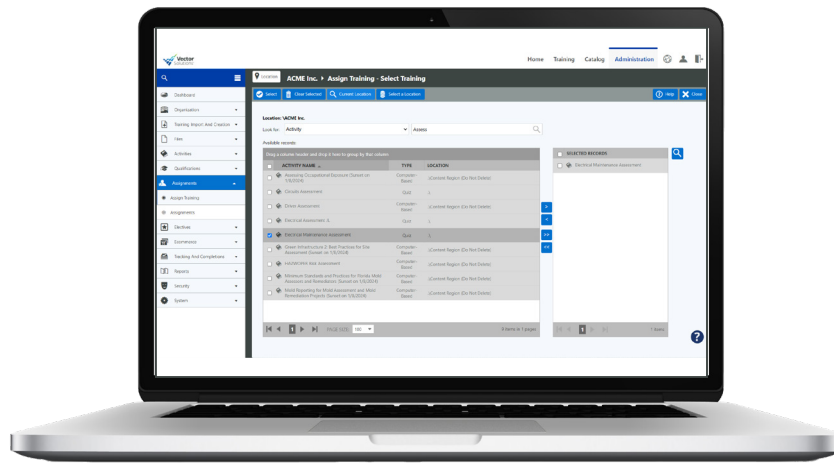

Provide Point-of-Need Performance Support

Let workers access training materials on mobile devices while on the job when and where they need it to improve performance.

Reduce Time and Expenses to Develop and Administer Training Program

Spend less time and money developing and administering your training program while improving skill development and getting better results.

Improve Skills, Retention with Learning Paths & Competency Assessments

Provide Training Paths for Onboarding & Career Advancement

Improve employee retention, employee engagement, and onboarding speed with Learning Paths for key industrial roles.

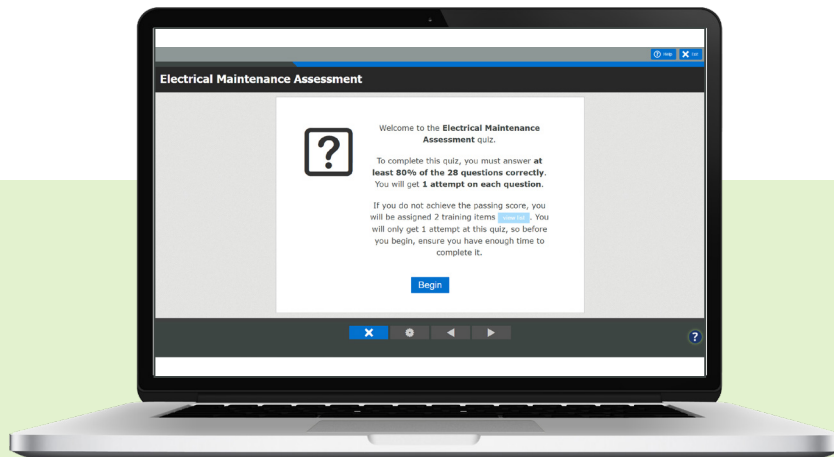

Automate Onboarding & Job-Specific Training Assignments

Automate the assignment of pre-designed new employee onboarding and training assignments specific to employee's job role, department, or location.

Assess Worker Skills & Knowledge with Competency Assessments

Use our Competency Assessment tool to accurately identify employee skills gaps and quickly identify specific training required to fill those gaps.

Create Custom Training & Training Activities

Import Training Materials & Integrate with Key Workplace Software

Import self-created or third-party eLearning courses into the LMS for assignment and completion. And seamlessly integrate with other software systems such as HRIS, ERP, CRM, etc.

Use LMS Tools to Create Training Activities

Create custom training activities within the LMS such as quizzes, task lists, courses, and surveys to improve learner retention and evaluate training and performance.

Manage Compliance Requirements & Mitigate Risk

Assign Safety and Compliance Training

Create personalized compliance-training assignments based on the worker's real risks, job role, team, location, and more.

Provide Accredited Courses to Maintain Licenses

Give licensed professionals easy access to the accredited courses they can use to fulfill Continuing Education (CE) requirements and maintain their licenses.

Track and Report on Training Completion Status, Key Dates & Recurring Requirements

Automate the tracking of online and instructor-led compliance training. Monitor due dates and recurring refresher training requirements; receive notifications about upcoming date requirements; automatically re-assign training when required.

Elevate Organizational Performance and Productivity While Reducing Risk

Integrate Vector LMS with our [Vector EHS Management](#) software and use [LiveSafe](#), our mobile risk & safety communication platform, to more effectively manage safety and compliance issues.

Why Vector Solutions?

Our online library of multimedia eLearning courses in SCORM format feature 3D animations and can be used for training as well as continuing education. Additional course features include:

Multi-language translations —
Our courses are translated into 40+ different languages

View courses anywhere with variable bitrate technology that automatically adjusts video quality to limit buffering

Train on any device with our mobile-optimized content that adapts to the layout of your learners' devices

Access what you need when you need it with interactive transcripts, making it easy to search and advance to selected topic

Work with an award-winning
eLearning provider

Industrial Premium Courses

Below is a list of the course categories featured within the Industrial Premium library. Each category includes multiple courses. Review the complete list of our courses [here](#).

Continuous Improvement

- Asset Condition Management
- Current Good Manufacturing Practices (cGMP)
- Lean Manufacturing and 5S
- Quality
- Reliability
- Total Productive Maintenance (TPM)

Core Industrial Skills

- Blueprints & Diagrams
- Computer Basics
- Equipment and Tools
- Geometric Dimensioning & Tensioning (GD&T)
- Industrial Materials
- Math Concepts
- Operator Responsibilities
- Rigging and Lifting
- Science Concepts
- Troubleshooting
- Welding

Electrical Maintenance

- Basic Electrical Safety
- Basic Electrical Theory
- Controls-Variable Speed Drives
- Electric Motors
- Electrical Circuits & Components
- Electrical Maintenance Fundamentals
- Electrical Schematics
- Electrical Test Equipment
- Electrical Wiring
- Generators
- National Electrical Code (NEC)

Electronics

- Basic Electronics
- Boolean Algebra
- Circuits
- Numerics
- Power Supplies

Health, Safety & Environment (HSE)

- Construction Safety
- Cranes & Rigging
- Custodial Safety
- Driving Safety
- Electrical Safety
- Environmental
- Equipment Safety
- Ergonomics

- Fall Safety & Working at Heights
- Fire
- First Aid
- General Safety
- HAZWOPER
- Hazardous Materials
- Health and Illnesses
- Hospitality Safety
- Lockout and Energy Control
- OSHA 10-hour Construction
- Personal Protective Equipment
- Process Safety Management
- Restaurant Safety
- Safety Management

Instrumentation & Control

- Basic Instrumentation Diagrams
- Instrumentation
- Process Controls—Continuous Process
- Process Controls—Foundation
- Process Controls—Network
- Programmable Logic Computers (PLC)

Mechanical Maintenance

- Air Systems
- Basic Plant Science—Mechanical
- Bearings
- Compressors
- Conveyors
- Fans
- HVAC
- Heat Exchangers
- Hydraulics
- Industrial Refrigeration Systems
- Lubrication
- Mechanical Drives
- Pipes and Valves
- Pneumatics
- Pumps
- Seals
- Shaft Alignment
- Vehicle Maintenance
- Vibration Analysis

Power Generation

- Boilers
- Combustion Turbines
- Condensers
- Environmental Protection
- Power Plant Operation
- Power Plant Protection
- Turbines

- Water Systems
- Water Treatment

Process Operations

- Chemistry
- Diagrams (IPO)
- Distillation
- On-the-Job Training
- Operator Responsibilities
- Plant Operations Basics
- Process Equipment and Operations
- Process Sampling
- Refining Technologies
- Refrigeration Systems (IPO)
- Statistical Process Control
- Storage Tanks

Professional Development

- AEC Success
- Communication
- Computer Skills
- Customer Service
- Cyber Awareness
- Diversity, Equity, an Inclusion (DE&I)
- Financial Management
- Health & Wellness
- Human Performance
- Human Resources and Legal
- Leadership
- Management
- Policy and Compliance
- Sales and Business Skills

Project Management

- Agile Project Management
- Construction Project Management
- Financial Management
- From IT Professional to Manager
- PMBOK Guide
- Project Management Communication
- Project Management Computer Skills

Electrical Transmission & Distribution

- Overhead Line
- Rigging
- T&D Construction
- T&D Distribution
- T&D Equipment
- T&D Maintenance
- T&D Safety
- T&D Systems and Theory
- Underground Line/Cable
