

Acadis Insights

With Acadis Insights, view complex information and data correlations to help your organization know where to focus its efforts.

Acadis Insights allows you to analyze and present your data in dashboards and graphical representations to simplify analysis. For example, the Personnel Certifications dashboard shows certification and expiration trends, allowing you to more easily track and report on personnel compliance status.

You can also choose which dashboards are shared with each role in your organization—from leaders to supervisors to training coordinators. Acadis Insights ensures you're getting the actionable data you need

Key Benefits

Easier reporting

Quickly pull accurate and up-to-date information

Track KPIs

Manage and track key performance indicator (KPI) metrics in one place

Better decision-making

Make decisions based on timely, accurate and reliable data

Analyze inefficiencies

Proactively find and respond to inefficiencies within your agency

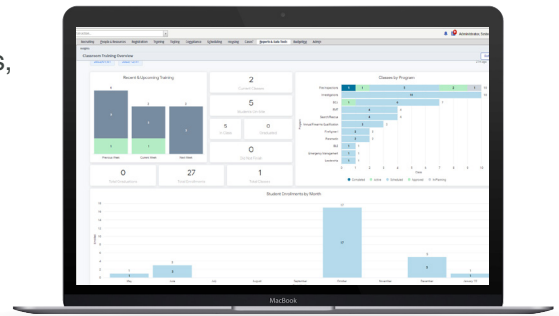

Collaborate effectively

Easily share actionable insights

Training Dashboard

See an overview of student registration, assignments, certifications, testing scores, and more. With this dashboard, you can:

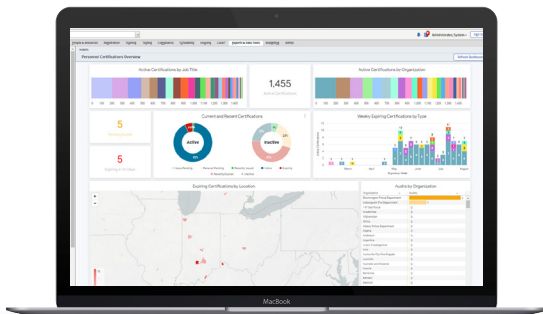

- Give individual instructors insights into their roster of students and course assignments
- See enrollments and cancellations in real-time
- View training rosters at a glance
- Understand your class composition by certification program

Personnel Certifications

Get an overview of certifications issued and expired in a given period across your department, your state, or the entire nation. Filter the information further by location, job title, and organization. In this dashboard, view:

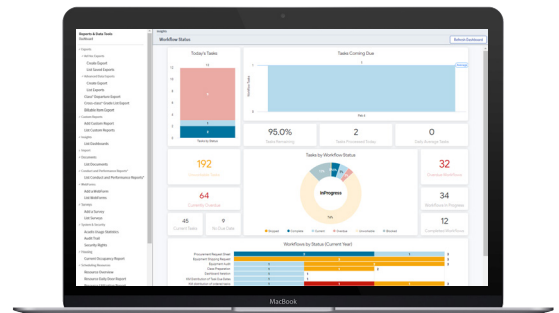

- Number of certifications issued
- Active or expired certifications across different departments
- Expiring certifications by location
- Certifications by role, gender, age, or course topic

Workflows Dashboard

Get a better understanding of the workflows happening in your organization, as well as what tasks are being completed and what the week looks like. In this dashboard, you can see:

- Status of tasks in a workflow
- Number of tasks approved, rejected, blocked, etc.
- Tasks due in the upcoming week by day
- High-level view of workflow and task status

Incarcerated Population Dashboard

View a high-level analysis of your correction facilities, including capacity and population metrics. In this dashboard, you can examine:

- Detailed distributions of the incarcerated population
- Capacity information across facilities
- Number of total beds and beds available
- Changes in the incarcerated population over time
