Acadis Case Management

Acadis Case Management lets you add, track, and manage cases that may require formal investigation—including complaints, claims, and employee conduct. Set permissions for users with the appropriate rank to view, add to, delete, and edit cases as necessary, including attaching documentation relevant to the case.

This means that in a matter of minutes, all records and information connected with a case can be reviewed thoroughly and efficiently.

Acadis Case Management helps your organization maintain consistent case records with all relevant information, including points of contact.

Key Benefits

Optimize Data

Reduce confusion about case progress and details with unified naming conventions and case status indicators.

Save Time

Rather than relying on legacy systems that separate names, documents and details, take advantage of a single module that holds all this information in one place.

Dig Deeper
A single location for all case-related data means a more convenient—and more reliable—method for investigating the details of a case.

Stay Current
With all the information you need about a case, you won't have to worry about missing paperwork or other data—and that what you see is the most recent data available.

Feature Comparison

Unlike generic systems, the Acadis Readiness Suite was built from the ground up to meet the unique needs of public safety and military agencies. Acadis delivers more comprehensive functionality to automate manual and time-consuming processes and eliminate fragmented, siloed systems.

Feature	Acadis®	Generic
Create case records unique to formal investigations	✔	✔
Attach relevant, up-to-date documentation to case records	✔	
Update the status of cases in real time	✔	
Eliminate separate recordkeeping systems to consolidate information	✔	
Identify specific persons of contact related to cases	✔	
Fully integrated with other Acadis modules	✔	
Do it all on a high-security system framework (FedRAMP-authorized and FISMA & DHS 4300 compliant)	✔
