Acadis Inventory

Acadis Inventory is designed to help track, manage, certify, and deploy critical resources so you know exactly what you have on hand—and whether that resource is ready on a moment's notice.

Through the Acadis Inventory module, you can track essential individual and agency attributes for each asset, including the date entered into (or removed from) service, National Incident Management System (NIMS) typing definitions, and more.

As your team adds new inventory resources—vehicles, communications gear, service animals, med kits, etc. you can build, edit, and maintain new records throughout the lifecycle of each resource.

Acadis Inventory lets you track chain of custody records as resources are transferred—and even monitor certifications attached to each asset.

Key Benefits

Increase Response Efficiency

Generate more effective incident response by avoiding time-consuming searches for crisis-ready resources

Facilitate Personnel Moves

Ease transfer and retirement processes by knowing what inventory is assigned to each member of your team

Strengthen Forecasts

Identify gaps in required assets to justify proposed budget allocations

Support Litigation

Access records to support requests for information during litigation

Stay Ready

Know precisely what you have, who's responsible for it, and its current status, all while ensuring you have an accurate stock of NIMS resources prepared to be deployed during incident response

Support Compliance

Track the chain of custody of assets quickly and easily, to ensure your team maintains federal, state and local certification, and NIMS requirements

Feature Comparison

Unlike generic systems, the Acadis Readiness Suite was built from the ground up to meet the unique needs of public safety and military agencies. Acadis delivers more comprehensive functionality to automate manual and time-consuming processes and eliminate fragmented, siloed systems.

Feature	Acadis®	Generic
Track resources and organizational ownership	✔	✔
Maintain resource status	✔	✔
Store service entry and removal dates	✔	✔
Search for resources by type, location, and organization	✔	✔
Certify select resources as ready	✔	
Manage resource expirations/recertification requirements	✔	
Store National Incident Management System (NIMS) typing data	✔	
Track service animals and their training (e.g., K-9, horses, etc.)	✔	
Track weapons including firearms (make, model, caliber, serial number, and other vital information)	✔	
Schedule individual resources (requires Scheduling license)	✔	
Maintain chain of custody records	✔	
Full audit of chain of custody including all edits for legal defensibility	✔	
Full integration with Acadis Training, Scheduling, Compliance, and Portal	✔	
High-security system framework (FedRAMP-authorized and FISMA & DHS 4300 compliant)	✔
