Acadis Portal

The Acadis Portal provides a web-based platform for training and compliance organizations to publish information to—and collect data from—agencies and field offices. Its key components help you maintain convenient access to accurate, comprehensive, and legally defensible training records.

Portal Framework

With the Acadis Portal, you can capture and compile training and certification information for the public safety programs that you manage. You can also submit detailed training events, attach personnel rosters, and track attendance as part of each professional's lifelong learning record. Increase the accuracy of your training and compliance records while reducing paper-based reporting and redundant data entry.

Instructor Scheduling Portal

Through the Acadis Instructor Scheduling Portal, you can let your instructors view their training calendars, report availability, and immediately notify academy staff of scheduling conflicts.

Workforce Portal

The Acadis Workforce Portal enables authorized personnel to securely access their employees' data, including contact information, certification status, expirations, and more. Get an accurate view of individual and team readiness, ensure compliance, and eliminate paperwork bottlenecks and delays.

Online Registration Portal

The Acadis Registration Portal simplifies the process for training coordinators and personnel to view and register for upcoming training events. The tight integration with the Acadis Registration module streamlines information for course catalogs with prerequisites, calculates seat availability, and even adds students to waitlists.

Personal Portal

Empower your personnel to manage their professional development through the Acadis Personal Portal. It lets them review their training history and qualifications, and flag certifications that are out-of-status or about to expire.

Feature Comparison

Unlike generic systems, the Acadis Readiness Suite was built from the ground up to meet the unique needs of public safety and military agencies. Acadis delivers more comprehensive functionality to automate manual and time-consuming processes and eliminate fragmented, siloed systems.

Portal Framework Features	Acadis®	Generic
Online access to training records	✔	
Submit in-service training events	✔	✔
Calculate in-service training hours	✔	✔
Administrative approval	✔	✔
Supervisor review	✔	✔
