# Simple and Efficient Video Auditing & Evaluation with BWC

BWC provides an efficient and simple tool for making sense of the massive amounts of video footage from body worn cameras and motorized vehicle cameras.

Frontline's BWC Audit Software gives law enforcement agencies a simple, structured way to audit officer body worn and motorized vehicle camera video footage, conduct digital video footage reviews, and flag training needs—without adding unnecessary burdens on front-line supervisors. It provides dashboards, reports, and real-time alerts for command staff to help agencies stay ahead of issues, reduce liability, and demonstrate proactive leadership to an agency's community and oversight bodies.

Structured audit process that helps agencies **proactively identify officer behavior trends and training opportunities.** BWC helps agencies stay ahead of issues, reduce liability, and demonstrate proactive leadership to an agency's community and oversight bodies.

Comprehensive dashboards and reports for command staff to review department-wide and individual officer performance. Filter by officer, date, time periods, shifts, and even individual categories to provide insight to identify training needs and conduct issues.

Customizable forms, alerts, and chain of command workflows provide the right supervisors and leadership notification when needed. **Set audit parameters that remove subjectivity** and ensure all officers receive the same number of reviews and a consistent evaluation process.

Easy to Use and Efficient Audit Process

Frontline BWC is easy to use and provides law enforcement agencies with an efficient means to leverage video footage beyond just reviewing when an incident occurs.

Structured Audit Process, Actionable Insights

The structured audit and evaluation process helps supervisors monitor officer performance and identify correctable officer behaviors that inform training and coaching programs.

Save Time With Out-of-the-Box Form Templates

Leverage Frontline BWC pre-loaded evaluation forms or customize your own. Define the evaluation scoring process using points as needed by defining the metrics that you set up in the system.

Agency-Defined Alerts Keep Supervisors Informed

Agency-defined alerts dynamically trigger email notifications to supervisors. Agencies select the question(s) for alerts and the number of infractions during a specific time period. When the criteria are met, alerts remain visible in the program until dispositioned.

Structured Audit Process Improves Transparency and Trust

Frontline BWC auditing software selects video footage for review using customizable forms and agency-defined parameters (by officer, date, type of call, etc.) for more transparent performance reviews that enhance internal agency and public trust.

Comprehensive Reports for Better Accountability and Risk Reduction

Track trends and training needs through dashboards and reports that provide leadership with the information needed to ensure officer accountability and reduce liability risk.

Easier Access to Information—with One Login

Frontline has nine cloud-based solutions housed under one login and website page. Remove administrative burdens and limit your vendor contracts with Frontline's suite of solutions.
