Purpose-Built for State EMS Training, Licensure & Compliance Management

Because Readiness Saves Lives

State EMS offices are responsible for issuing, renewing, and managing certifications and licenses for thousands of EMS professionals across a variety of provider types, qualifications, agencies, and jurisdictions. From initial certification to ongoing recertification and continuing education, managing EMS licensure and renewals at scale is complex and the stakes are high.

As EMS requirements evolve, state EMS officials need a modern, fully connected system that ensures real-time compliance, accurate data, and seamless coordination across training providers, testing, and national systems. Acadis is purpose-built to help state EMS agencies manage the full lifecycle of EMS licensure, continued education, skills training, and renewal compliance.

Built for Mobile-First EMS Professionals

EMS professionals are rarely behind a desk. Acadis meets them where they are. Mobile-first capabilities include:

| Skills assessments completed in the field | Digital certificates and licenses displayed on a phone | Secure mobile access to training history and credentials | Smart push notifications for renewals, deadlines, and required actions |

Real-Time Data You Can Trust

Decisions about workforce readiness, compliance, and public safety depend on accurate data. Unlike legacy solutions that rely on delayed updates or manual reconciliation, Acadis ensures state EMS leaders have access to the most current, reliable information. Acadis supports integration with the *EMS Compact*, helping ensure accurate, real-time licensure and compliance data is shared across states. Acadis also supports alignment with national systems such as the *National Registry of Emergency Medical Technicians (NREMT)* and the *Commission on Accreditation for Pre-Hospital Continuing Education (CAPCE).*

Further system integration and data automation is offered for continuing education reporting from the TargetSolutions training management system to Acadis via AgencyConnect. Vector Solutions is the largest training reporting entity of CAPCE approved online courses. As such, the integration that automates CAPCE course completions from the TargetSolutions system, used by more than 5,000 local public safety agencies, to the Acadis system, enabling real-time reporting without additional data entry as EMS professionals complete their continued education. This automated reporting capability saves administrative time for local departments as well as state EMS agencies.

Interoperability and real-time training and compliance information is essential for modern EMS oversight and emergency medical professional readiness insight. Acadis provides multiple system integrations that removes system fragmentation and improves data access to provide EMS officials with the information needed to ensure emergency medical provider readiness.

Acadis: Proven Technology for EMS Training and License Management

Acadis is used by more than 2 million first responders to maintain license compliance. For more than two decades, over 100 federal, state, and local government agencies have relied on Acadis to manage the full lifecycle of training and license management. Acadis is purpose-built to help state EMS agencies manage licensure, continued education, skills training, and renewal compliance.

Online Access. No Emails, Phone Calls Needed
Enable online registration for training, testing, certification, and license renewals via a state-branded, secure portal

Customize Your Training
Create and manage EMS certification and recertification programs

Leverage Online Training
Deliver online continuing education through an integrated LMS

Conduct Secure Online Testing
Bulk load your test banks for each license type, update as needed, and leverage question and answer randomization and lock-down browsers to ensure test integrity

No Clipboards Allowed
Digitize all your data to remove manual process; record observed skills tests using the Acadis Mobile App

Easy Access to EMS Certs
Issue digital EMS certificates and make them accessible on a secure, password protected portal via PC and in the mobile app

Streamline Certification Tracking
Match learning to career roles and track CEUs by certification type and renewal cycle

Auto-Report CEUs
Automatically report EMS CEUs from TargetSolutions directly into Acadis

Integration with EMS Compact
EMS Clinicians with a valid, unrestricted license in any EMS Compact Member State are granted an immediate Privilege to Practice, recognized across all participating states

Legally Defensible Data
Easily access defensible documentation for any sanctions taken against personnel or for FOIA requests

Built for Scale
Access real-time, hire-to-retire training and compliance status for thousands of personnel

Actionable Data Insights
Provide real-time dashboards and compliance reporting for leadership that turn data into action
