

AcadisConnect

AcadisConnect is the only technology solution that connects academies and metro agencies with state-level certifying authorities. AcadisConnect enables academies and metro agencies to pass required training records from their Acadis instance to state level certifying Acadis instances with ease, while giving State certifying authorities an automated way to collect and verify thousands of records submitted in real-time from agencies across the State in one centralized application. State agencies will now have a real-time, authoritative view of state-wide compliance for all responders in one centralized application.

Key Benefits

Ensure Consistent, Verified Training Records

Agencies, academies, and state licensing/certification authorities access a single source of truth for completed courses—improving data accuracy, public trust and overall readiness.

Accelerate Certification and Licensing Processes

Real-time sharing of verified training completions accelerate certification conferral and renewal processes without interference of administrators, greatly reducing administrative workload and streamlining processes.

Eliminate Redundant Data Entry

Shared training completions flow automatically between systems, reducing manual reporting, administrative burdens, and the risk of human error.

Improve Training and Certification Transparency

Seamless interoperability provides immediate visibility into responders' training and certification levels, giving incident commanders confidence when deploying personnel to multi-jurisdictional emergencies.

Enhance Strategic Planning and Compliance Oversight

Unified visibility into training activity across the ecosystem enables better forecasting, real-time compliance monitoring, and readiness assessments at local, regional, and state levels.

Feature Comparison

Unlike generic systems, the Acadis Readiness Suite was built from the ground up to meet the unique needs of public safety and military agencies. Acadis delivers more comprehensive functionality to automate manual and time-consuming processes and eliminate fragmented, siloed systems.

Feature	Acadis®	Generic
Deliver online training	✓	✓
Track in-person training via PC and mobile app	✓	Limited
Match learning to career roles	✓	
Provide permission-based approval and/or rejection of automated training completions	✓	
Automate subsequent approved and/or rejected training completions, eliminating additional reviews of the same course	✓	
Enablement multiple category labels for trainings that can meet more than one requirement	✓	
Provide real-time training and compliance status for thousands of personnel training in different locations	✓
