Simplify Daily Observation Reporting With FTO Tracker

FTO Tracker Modernizes, Streamlines, and Simplifies Officer DORs

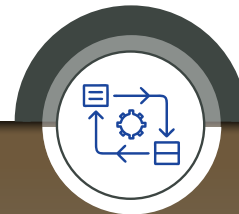

Frontline's FTO Tracker simplifies how law enforcement agencies manage new officer training progress, accountability, and documentation by digitizing Daily Observation Reports and tracking the entire field training program. Empower your FTOs with intuitive dashboards, customizable forms, and automated processes to ensure high-quality training and efficient oversight.

Modernize manual DOR processes like handwritten forms, spreadsheets, and email communications which are inefficient and prone to error. **Digitize and simplify your entire FTO program with Frontline FTO Tracker.**

FTO Tracker provides the tools that FTOs and command staff need and new officers want to ensure real-time feedback, clear training status tracking, consistency in scoring, and **better overall transparency and accountability.**

FTO Tracker streamlines processes like automated signature routing and real-time reporting. **Save significant time and make DOR processes efficient, consistent, and scalable, even for the shortest-staffed agency.**

Customizable DORs and Scoring Options

FTO Tracker makes it easy to customize questions, categories, event types, checklists, workflows, and scoring. Leverage out-of-the-box forms or create your own. Select scoring options that meet your FTO program with built-in N.O. (Not Observed) and N.R.T. (Not Responding to Training) scoring logic. Require commentary for low (or high) ratings and add definitions to the respective scoring options to drive more consistent evaluations across your FTOs.

At-a-Glance Dashboards and Easy Reporting

Access out-of-the-box reports and visual dashboards that quickly provide the information needed to identify training needs and process improvements. Create your own ad-hoc reports by selecting the data fields you want to see. Trainee Timeline reports show color-coded scoring over a period of time that makes it easy to see where an officer is excelling and where more training is needed. N.R.T. flags make it easy to identify areas that an officer is not responding to training. Filter any report by trainee, date, shift, FTO evaluator, or training phase.

Automated Signature Routing Streamlines Reviews and Approvals

Email alerts and dashboards notify the right people when a review and/or approval is needed. The "Pending DORs" dashboard enables FTOs to pick up where they left off to complete a DOR. Multiple FTOs/Supervisors can be added to an officer's review and dashboard views show where every DOR is at in the approval process. Eliminate bottlenecks by automating workflows and reminders.

Comparison Report Improves FTO Evaluator Consistency

Your Command Staff will appreciate the FTO Tracker Comparison Report that provides a side-by-side evaluator rating view to help identify outliers and improve scoring consistency across your field training officers.

Easier Access to Information—with One Login

Frontline has nine cloud-based solutions under one login; leverage FTO Tracker, Training Tracker, Policy Tracker, Pro Standards Tracker, Performance Tracker, BWC Audits, and Community Policing Connect without having to log into separate programs. The consistent user interface helps your team become proficient with the application faster, to expedite your return on investment.
