# Simplify Training Management With Training Tracker

Training Tracker Modernizes, Centralizes, and Streamlines Your Training Program and Helps Ensure Everyone Stays Compliant
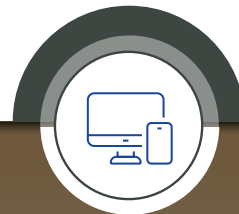

Frontline's Training Tracker modernizes how your agency handles all aspects of training—from scheduling to compliance reporting. Leverage the system's visual dashboards, automated reminders, and tools to easily assign and track all your training. Whether preparing your annual budget, reporting mandated training for recertification or agency accreditation proofs, or for litigation or an audit, Training Tracker provides the data and documentation you need in minutes.

Eliminate paper and spreadsheet training records and centralize all your training management with Training Tracker. Training supervisors can easily assign and monitor agency-wide training compliance while employees gain access to their personal training records and required actions.

Gain improved insight and compliance assurance with an easy-to-use platform to manage, track, and report on all certifications and training—state-required continued professional training, agency training, range qualifications, defensive tactics, CPR, third-party training, and more—while tracking related expenses, weapons / equipment used in training, and more.

Document all aspects of your training in one place—expenses, training requests, certifications, training events, etc. Configure Training Tracker to work the way your agency works, with customizable categories, fields, and more.

Simplify Your Mandated Training Compliance

Get real-time insight into your entire team's required training status and automate tracking of every required training mandate down to the hour. Easily export reports to simplify your state-mandated reporting.

Ready-to-Run Reporting

Whether for your state-required training, a public records request, a training record subpoena, an accreditation proof, or to analyze how many times a certain training has been taken, Frontline Training Tracker provides a centralized location to track and report on all your training in one place.

Track Training Requests and Expenses

Track training requests and all training expenses in the same platform that manages your training program. Allow your personnel to request a training course with automated supervisor workflow for approval. Assign and filter training expenses by officer, course, or location to optimize your training spend.

Save Time With One-Click Training Course Reuse

Save time by storing and reusing training course information, reducing duplicate data entry. After the course has been set up, create training events, enter the details and invite multiple employees from one page. Rinse and reuse the course annually or however often you offer it.

Employee Dashboards Offer Transparency

Employees have more insight into their training status with a dashboard that shows their respective training records, including completed and pending courses, certifications, upcoming deadlines, and completed surveys. Better transparency helps mitigate non-compliance and excuses.

Automate Manual Process and Save Significant Time

Save time by automating manual processes with Training Tracker. From training invitations and reminders, to calendar syncing, to armory assignments and inventory, let the system handle the administrative burdens.

Easier Access to Information—with One Login

Frontline has nine cloud-based solutions under one login; leverage Policy Tracker, Pro Standards Tracker, Performance Tracker, and more without having to log into separate programs. The consistent user interface helps your team become proficient with the application faster, to expedite your return on investment.
