

# Deliver More Training and Simplify Reporting with TargetSolutions' Statewide Platform

Vector Solutions empowers state authorities with a flexible statewide training management platform.

This enterprise solution enables you to standardize training delivery across departments, simplify training reporting and certification management processes, and improve communication and collaboration.

Customize your statewide platform with the training-related activities that matter to you and provide access to local departments to streamline various requirements that you need to track.

Support departments with limited resources while standardizing state-wide training for all fire departments for more cohesive, efficient, and compliant emergency response across the state.

Configure with just the functionality you need at the state-level and allow departments to add additional functionality to their individual site to optimize department-level training management at their discretion.

## Digitize and Automate Credential Management

Create custom task books with your state specific activities to document hands-on training, track licenses and qualifications, and manage bundled training and compliance requirements with ease. Eliminate manual training record submissions with auto-reporting to verify state-required completions.

## Provide State Approved Training Activities

Build and maintain your state's training documentation that departments can readily access to simplify meeting training requirements, giving you real-time results as training is recorded.

### **Deliver High-Quality Online Training Courses**

Provide supplemental training with access to selected firefighter (NFPA-based, wildland, etc.), CAPCE-accredited and/or state approved EMS, OSHA, HR, driver safety, and other public safety course catalogs. [Explore libraries](#)

---

### **Generate Comprehensive Reporting**

Run flexible, detailed reports on state-provided training for critical insight into training progress and gaps to inform decisions and prove competencies.

---

### **Simplify Tracking ISO Training**

Optimize tracking and reporting with pre-built training trackers aligned with ISO's training benchmarks.

---

### **Streamline EMS Recertification**

Leverage pre-loaded training trackers designed to meet EMS compliance and recertification training requirements for every provider level.

---

### **Efficiently Schedule and Manage Events**

Coordinate in-person or remote training and events for all or select departments and users, allow online registration, provide access to related resources, and manage attendance or make changes on the fly.

---

### **Share Statewide News and Updates**

Post announcements and other important information to strengthen transparency, awareness, and accountability across departments.

---

### **Empower Departments with Community Resources**

Offer 24/7 access to invaluable shared content and tools from other departments using TargetSolutions.
