VectorSolutions™ | **ACADIS®**

The Only Purpose-Built Standards & Training Software for Fire Certifying Bodies

Simplify documentation and accountability with a centralized system designed for state fire authorities.

Eliminate manual reporting processes and provide agencies a secure portal to update and access their records with Acadis®.

Easily access comprehensive records
Eliminate time spent searching for and compiling firefighter information. Easily access comprehensive hire-to-retire records and provide transparent, accurate, and real-time data in minutes.

Promote accountability and compliance
Easily track compliance of personnel under your authority. Use alerts and audits to ensure everyone and everything remains in compliance.

Offer a transparent self-serve portal
Provide a secure, self-serve portal for firefighters, supervisors, instructors, and local departments to access their records and easily comply with reporting mandates. Maintain up-to-date training and certification data and manage certifications, renewals, and expirations in a single system.

Ensure defensible documentation
Ensure your documentation meets high standards of integrity, security, and thoroughness. Easily manage hire-to-retire training and compliance records in a single system.

Integrate Academy Automation
If your organization runs an academy, leverage Acadis® Academy Automation to schedule, register, and manage your instructors, resources, and training operations. Save administrative time and centralize all your academy information in one place.

What's Included	How Does It Benefit Our Organization?
Training	• **Track and manage** training records, certifications, qualifications, expirations dates, test scores, certificates • **Ensure accountability** with thorough hire-to-retire training records
Testing / Online Testing	• Question types (true/false, yes/no, multiple choice, multimedia, etc.) and items from the question and learning objective repositories, and can randomize test questions and responses and track exam and question versions; leverage anti-cheat controls and test item validity stats
Compliance	• **Set and track** multi-level personnel, facility, and resource/equipment compliance categories (training, certification, skills, age, documentation, resources, organizations, facilities, custom attributes) • **Manage** compliance with certificate expiration alerts, online renewals, and audits
Documents	• **Store and set permissions for access to manage** standard documents (Microsoft PowerPoint®, Word®, Excel®, JPEG, PNG, PDF) and associate with individual personnel, facilities, resources, and equipment
Portal for officers, supervisors, instructors, students, etc.	• **Provide** online access to training records, certifications, renewal information and other user-defined information to streamline local agency reporting and state records access
