# Simplify Asset Management to Keep Operations Running Smoothly

Always Know the Status of Your Trucks, Apparatus, Equipment, Hydrants and Inventory with the Check It Mobile App

Vector Check It and its native mobile app provide fire departments with a faster, easier, and more secure way of conducting and documenting inspections and checks.

With **Check It,** fire departments can eliminate the hassle of paper and pencil forms and reduce the amount of time spent on inventory, equipment, and apparatus management. Streamline asset management and simplify meeting NFPA's standards for tracking every event for every piece of PPE from acquisition through decommission.

Simplify Inspections

- Create custom inspection checklists to simplify weekly or monthly checks of apparatus, PPE, equipment, and other supplies.

- Send push notifications to remind users when checks for each specific piece of equipment are required.

- Utilize the built-in maintenance ticketing system to keep all equipment-related data in one place, streamline repairs, and facilitate communication across shifts and stations.

- Get an at-a-glance visual of all items logged in the system, including those requiring repair, out of service, or decommissioned.

Accessible
Conduct inspections with this powerful application, available on any iOS or Android mobile device. Personnel have the peace of mind that when a 9-1-1 call comes in, the equipment they depend on will be ready.

Accountability
Ensure all equipment, including PPE and inventory are checked, inspected and serviced regularly. Utilize built-in verification features like eSignatures and biometric security options to verify inspections are performed on time and to completion.

Actionable
Review intuitive and easy-to-visualize dashboards to get a holistic picture of equipment-related expenses including uptime, downtime, maintenance costs, and the lifespan of equipment. Utilize these automatically generated graphs and figures to support strategic planning initiatives, annual reporting, or to justify new equipment expenditures.
